## DETAILED ACTION

### *Drawings*

1. The corrected or substitute drawings were received on 12/26/2002. These drawings are not approved because the words and reference numerals added thereto are not legibly written and the lines are not uniformly thick and well defined.
2. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. **The objection to the drawings will not be held in abeyance.**

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 1-5 and 7-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujita (U.S. Patent 6,115,886). Fujita discloses a hinge including shaft (1, 8) and housing (4, 5, 6) portions. The shaft has a portion (8) carrying a bearing surface (8a) and a portion extends radially beyond the bearing surface (adjacent 8b). The hinge has an engagement surface

Art Unit: 3671

(adjacent 6a). The shaft and housing are movable relative to one another such that portion (adjacent 8b) is and is not engaged with the engagement surface (see Figures 1 and 2).

There is a biasing spring (9).

Regarding claims 10 and 11, Fujita is used in electronic devices (abstract, for example).

### ***Response to Arguments***

5. Applicant's arguments filed 12/26/2002 have been fully considered but they are not persuasive. The additional limitation of "integrally formed" does not overcome the prior art rejection because the structure of Fujita is within the scope of this term. It appears that the term may be intended to mean --fixed in a stationary position--, but that is not the denotation of the term. Since the structure as claimed continues to be met by Fujita, the rejection stands.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3671

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
